

We want to bring companies into the crypto space by using it in a legal and safe way for transactions only, but still fully getting paid in Thai Baht. After the first few transactions and legal sales, the confidence in Crypto and Bitcoin will grow and by our educational services, anyone will be able to understand Bitcoin, Blockchain and Crypto.

The crypto space is much bigger than only Bitcoin. But Bitcoin is the first step to understand the great idea behind it and most other projects. **In a few years, we will use crypto in our daily lives as decentralized financial services, quicker and cheaper payment solutions**, in terms of IOT as well as for a safer and unchangeable internet for payments and ownership.

Most people can't imagine the future impacts that crypto will bring into our daily lives in future. We have to keep in mind that most of those projects are approx. 3-5 years old (Bitcoin about 11 yrs.) but with the current regulations, we are on a good way to use these services in a legal and safe way, audited by Governments (Internet was introduced in 1994). Just because people try to scam others by the Internet, it does not mean that the Internet is a scam - It's the same with Bitcoin! With our educational and personal services we will educate and protect You to use Bitcoin and Crypto in a legal and safe way!
